

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1. (Currently Amended) A method for use in a server serving a user of a communication device, the method comprising:

maintaining a plurality of profiles of the user;

receiving, through a communications network, a request for information concerning one or more product or service providers, and data indicative of a selected ~~profile~~ one of the profiles and a location of the communication device determined by the communication device;

collecting requested information from one or more sources based on the received data;

providing the requested information to the communication device, the requested information including information concerning at least one product or service provider, selected in a vicinity of the location of the communication device and in accordance with the selected profile; and

providing data for the communication device to indicate to the user a location of the at least one product or service provider relative to the location of the communication device.

Claim 2. (Original) The method of claim 1 wherein the profiles include a personal profile.

Claim 3. (Original) The method of claim 1 wherein the profiles include a business profile.

Claim 4. (Original) The method of claim 1 wherein the profiles include a vacation profile.

Claim 5. (Original) The method of claim 1 wherein the one or more sources are connected to the Internet.

Claims 6-25 (Cancelled)

Claim 26. (Previously Presented) The method of claim 2 wherein the personal profile includes a medical record, at least part of the collected information comprising personal medical information being stored in the medical record.

Claim 27. (Previously Presented) The method of claim 1 wherein one of the profiles includes a financial record, at least part of the collected information comprising financial information being stored in the financial record.

Claim 28. (Previously Presented) The method of claim 1 wherein the collected information is stored for the user based on the location of the at least one product or service provider.

Claim 29. (Previously Presented) The method of claim 1 wherein the collected information is stored for the user based on one or more types of product or service provided by the at least one product or service provider.

Claim 30. (Previously Presented) The method of claim 29 wherein one of the types of product or service concerns entertainment.

Claim 31. (Previously Presented) The method of claim 29 wherein one of the types of product or service concerns restaurants.

Claim 32. (Previously Presented) The method of claim 1 wherein the location of the communication device is indicated by GPS data.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 33. (Currently Amended) A system for serving a user of a communication device, the system comprising:

storage for maintaining a plurality of profiles of the user;

an interface for receiving, through a communication network, a request for information concerning one or more product or service providers, and data indicative of a selected one of the profiles ~~profile~~ and a location of the communication device determined by the communication device;

a processing unit configured to collect requested information from one or more sources based on the received data; and

an output element for providing the requested information to the communication device, the requested information including information concerning at least one product or service provider, selected in a vicinity of the location of the communication device and in accordance with the selected profile, the output element being configured to provide data for the communication device to indicate to the user a location of the at least one product or service provider relative to the location of the communication device.

Claim 34. (Previously Presented) The system of claim 33 wherein the profiles include a personal profile.

Claim 35. (Previously Presented) The system of claim 33 wherein the profiles include a business profile.

Claim 36. (Previously Presented) The system of claim 33 wherein the profiles include a vacation profile.

Claim 37. (Previously Presented) The system of claim 33 wherein the one or more sources are connected to the Internet.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 38. (Previously Presented) The system of claim 34 wherein the personal profile includes a medical record, at least part of the collected information comprising personal medical information being stored in the medical record.

Claim 39. (Previously Presented) The system of claim 33 wherein one of the profiles includes a financial record, at least part of the collected information comprising financial information being stored in the financial record.

Claim 40. (Previously Presented) The system of claim 33 wherein the collected information is stored for the user based on the location of the at least one product or service provider.

Claim 41. (Previously Presented) The system of claim 33 wherein the collected information is stored for the user based on one or more types of product or service provided by the at least one product or service provider.

Claim 42. (Previously Presented) The system of claim 41 wherein one of the types of product or service concerns entertainment.

Claim 43. (Previously Presented) The system of claim 41 wherein one of the types of product or service concerns restaurants.

Claim 44. (Previously Presented) The system of claim 41 wherein the location of the communication device is indicated by GPS data.

Claim 45. (Previously Presented) The method of claim 1 further comprising planning a route to the at least one product or service provider.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 46. (Previously Presented) The method of claim 29 wherein one of the types of product or service concerns gas stations.

Claim 47. (Previously Presented) The system of claim 41 wherein one of the types of product or service concerns gas stations.

Claim 48. (Currently Amended) A method for use in a server serving a user of a communication device, the method comprising:

- maintaining a plurality of profiles of the user;

- receiving, through a communications network, a request for information concerning one or more product or service providers, and data indicative of a selected ~~profile~~ one of the profiles and a location of the communication device determined by the communication device;

- collecting requested information from one or more sources based on the received data;

- providing the requested information to the communication device, the requested information including information concerning at least a first product or service provider in accordance with the selected profile, wherein the first product or service provider and at least a second product or service provider are selected in a vicinity of the location of the communication device; and

- providing data for the communication device to indicate to the user that the first product or service provider satisfies the selected profile and the second product or service provider does not satisfy the selected profile.

Claim 49. (Previously Presented) The method of claim 48 wherein the profiles include a personal profile.

Claim 50. (Previously Presented) The method of claim 48 wherein the profiles include a business profile.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 51. (Previously Presented) The method of claim 48 wherein the profiles include a vacation profile.

Claim 52. (Previously Presented) The method of claim 48 wherein the one or more sources are connected to the Internet.

Claim 53. (Previously Presented) The method of claim 49 wherein the personal profile includes a medical record, at least part of the collected information comprising personal medical information being stored in the medical record.

Claim 54. (Previously Presented) The method of claim 48 wherein one of the profiles includes a financial record, at least part of the collected information comprising financial information being stored in the financial record.

Claim 55. (Previously Presented) The method of claim 48 wherein the collected information is stored for the user as a function of a geographic location.

Claim 56. (Previously Presented) The method of claim 48 wherein the collected information is stored for the user based on one or more types of product or service provided at least by the first product or service provider.

Claim 57. (Previously Presented) The method of claim 56 wherein one of the types of product or service concerns entertainment.

Claim 58. (Previously Presented) The method of claim 56 wherein one of the types of product or service concerns restaurants.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 59. (Previously Presented) The method of claim 48 wherein the location of the communication device is indicated by GPS data.

Claim 60. (Currently Amended) A system for serving a user of a communication device, the system comprising:

storage for maintaining a plurality of profiles of the user;

an interface for receiving, through a communications network, a request for information concerning one or more product or service providers, and data indicative of a selected ~~profile~~ one of the profiles and a location of the communication device determined by the communication device;

a processing unit configured to collect requested information from one or more sources based on the received data; and

an output element for providing the requested information to the communication device, the requested information including information concerning at least a first product or service provider in accordance with the selected profile, wherein the first product or service provider and at least a second product or service provider are selected in a vicinity of the location of the communication device, the output element being configured to provide data for the communication device to indicate to the user that the first product or service provider satisfies the selected profile and the second product or service provider does not satisfy the selected profile.

Claim 61. (Previously Presented) The system of claim 60 wherein the profiles include a personal profile.

Claim 62. (Previously Presented) The system of claim 60 wherein the profiles include a business profile.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 63. (Previously Presented) The system of claim 60 wherein the profiles include a vacation profile.

Claim 64. (Previously Presented) The system of claim 60 wherein the one or more sources are connected to the Internet.

Claim 65. (Previously Presented) The system of claim 61 wherein the personal profile includes a medical record, at least part of the collected information comprising personal medical information being stored in the medical record.

Claim 66. (Previously Presented) The system of claim 60 wherein one of the profiles includes a financial record, at least part of the collected information comprising financial information being stored in the financial record.

Claim 67. (Previously Presented) The system of claim 60 wherein the collected information is stored for the user as a function of a geographic location.

Claim 68. (Previously Presented) The system of claim 60 wherein the collected information is stored for the user based on one or more types of product or service provided at least by the first product or service provider.

Claim 69. (Previously Presented) The system of claim 68 wherein one of the types of product or service concerns entertainment.

Claim 70. (Previously Presented) The system of claim 68 wherein one of the types of product or service concerns restaurants.

Claim 71. (Previously Presented) The system of claim 60 wherein the location of the communication device is indicated by GPS data.

Claim 72. (Currently Amended) A method for use in a server serving a user of a communication device, the method comprising:

receiving, through a communications network, a request for information concerning one or more product or service providers satisfying at least one user criterion, and data indicative of a location of the communication device determined by the communication device;

collecting requested information from one or more sources based on the received data; and

providing the requested information to the communication device, the requested information including selected information concerning a plurality of product or service providers satisfying the at least one user criterion, and respective directions and distances thereof from the location of the communication device, the selected information being formatted for the communication device to show the plurality of product or service providers on a list, wherein the list of product or service providers ~~being~~ is sortable on their direction and distance from the location of the communication device.

Claim 73. (Previously Presented) The method of claim 72 wherein the one or more sources are connected to the Internet.

Claim 74. (Previously Presented) The method of claim 72 wherein the collected information is stored for the user as a function of a geographic location.

Claim 75. (Previously Presented) The method of claim 72 wherein the collected information is stored for the user based on one or more types of product or service provided by the product or service providers.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 76. (Previously Presented) The method of claim 75 wherein one of the types of product or service concerns entertainment.

Claim 77. (Previously Presented) The method of claim 75 wherein one of the types of product or service concerns restaurants.

Claim 78. (Previously Presented) The method of claim 72 wherein the location of the communication device is indicated by GPS data.

Claim 79. (Currently Amended) A system for serving a user of a communication device, the system comprising:

- an interface for receiving, through a communications network, a request for information concerning one or more product or service providers satisfying at least one user criterion, and data indicative of a location of the communication device determined by the communication device;

- a processing unit configured to collect requested information from one or more sources based on the received data; and

- an output element for providing the requested information to the communication device, the requested information including selected information concerning a plurality of product or service providers satisfying the at least one user criterion, and respective directions and distances thereof from the location of the communication device, the selected information being formatted for the communication device to show the plurality of product or service providers on a list, wherein the list of product or service providers ~~being~~ is sortable on their direction and distance from the location of the communication device.

Claim 80. (Previously Presented) The system of claim 79 wherein the one or more sources are connected to the Internet.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 81. (Previously Presented) The system of claim 79 wherein the collected information is stored for the user as a function of a geographic location.

Claim 82. (Previously Presented) The system of claim 79 wherein the collected information is stored for the user based on one or more types of product or service provided by the product or service providers.

Claim 83. (Previously Presented) The system of claim 82 wherein one of the types of product or service concerns entertainment.

Claim 84. (Previously Presented) The system of claim 82 wherein one of the types of product or service concerns restaurants.

Claim 85. (Previously Presented) The system of claim 79 wherein the location of the communication device is indicated by GPS data.

Claim 86. (Currently Amended) A method for use in a server serving a user of a communication device, the method comprising:

receiving, through a communications network, a request for information concerning one or more product or service providers satisfying at least one user criterion, and data indicative a location of the communication device determined by the communication device;

collecting requested information from one or more sources based on the received data; and

providing the requested information to the communication device, the requested information including information concerning at least one product or service provider, and an operating status thereof, the at least one product or service provider being selected in a vicinity of the location of the communication device and in accordance with the at least one user

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

criterion, wherein the operating status indicates whether the at least one product or service provider is open for business.

Claim 87. (Previously Presented) The method of claim 86 wherein the one or more sources are connected to the Internet.

Claim 88. (Previously Presented) The method of claim 86 wherein the collected information is stored for the user based on a location of the at least one product or service provider.

Claim 89. (Previously Presented) The method of claim 86 wherein the collected information is stored for the user based on one or more types of product or service provided by the at least one product or service provider.

Claim 90. (Previously Presented) The method of claim 89 wherein one of the types of product or service concerns entertainment.

Claim 91. (Previously Presented) The method of claim 89 wherein one of the types of product or service concerns restaurants.

Claim 92. (Previously Presented) The method of claim 86 wherein the location of the communication device is indicated by GPS data.

Claim 93. (Previously Presented) The method of claim 86 further comprising planning a route to the at least one product or service provider.

Claim 94. (Currently Amended) A system for serving a user of a communication device, the system comprising:

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

an interface for receiving, through a communications network, a request for information concerning one or more product or service providers satisfying at least one user criterion, and data indicative a location of the communication device determined by the communication device;

a processing unit configured to collect requested information from one or more sources based on the received data; and

an output element for providing the requested information to the communication device, the requested information including information concerning at least one product or service provider, and an operating status thereof, the at least one product or service provider being selected in a vicinity of the location of the communication device and in accordance with the at least one user criterion, wherein the operating status indicates whether the at least one product or service provider is open for business.

Claim 95. (Previously Presented) The system of claim 94 wherein the one or more sources are connected to the Internet.

Claim 96. (Previously Presented) The system of claim 94 wherein the collected information is stored for the user based on a location of the at least one product or service provider.

Claim 97. (Previously Presented) The system of claim 94 wherein the collected information is stored for the user based on one or more types of product or service provided by the at least one product or service provider.

Claim 98. (Previously Presented) The system of claim 97 wherein one of the types of product or service concerns entertainment.

Claim 99. (Previously Presented) The system of claim 97 wherein one of the types of product or service concerns restaurants.

**Appln No. 09/910,510**  
**Amdt date February 12, 2008**  
**Reply to Office action of November 15, 2007**

Claim 100. (Previously Presented) The system of claim 94 wherein the location of the communication device is indicated by GPS data.
